BATMAN IS AMAZING

You should really read Batman comics or consume the various amounts of media that has originated from this cool ass superhero

Batman the animated series of batman overlooking gotham header

Quotes from Batman

"People need dramatic examples to shake them out of apathy" "If you make yourself more than just a man, if you devote yourself to an ideal, and if they can't stop you, then you become something else entirely." "How can you move faster than possible, fight longer than possible without the most powerful impulse of the spirit: the fear of death" "The first truth of Batman...it had to be one I don't like to admit. The gunshots left me alone. For years I was alone in the echoing dark of that well. But something else defined the exact moment Batman was born. The first truth of Batman...The saving grace. I was never alone. I had help."

"a hero can be anyone. Even a man doing something as simple and reassuring as putting a coat around a young boy's shoulders to let him know the world hadn't ended."

Alfred: Death and chance stole your parents. But rather than become a victim, you have done everything in your power to control the fates. For what is Batman if not an effort to master the chaos that sweeps our world, an attempt to control death itself?

BATMAN MEDIA RECOMMENDATIONS

This is what my email campaign looks like

Key notes I want to mark on what did not work
-It seems like all my images due to no images being able to be processed
-my checkered box system does not work on many different email clients
-contrast errors despite majority either using black and white or grey
-Expectedly none of the keyframe animations seemed to work

What did work:
-All the Alt description images in my image work
-Despite no images from emailsonacid the background backup still continued the work without the img itself as a blue background
-Button stayed in full effect with the padding border based approach
-The column setup and the stacked horizontal transition on some mobile platforms worked
-Passed screenreader tests from table presentation roles and to alt description for images.
-for the most part many stylings worked on the css side

Note:Some images are palette swapped because I forgot I have a google extension that force darkmodes websites
